

Documents Required for Infant Nutrition Manufactured Outside the Eurasian Customs Union (EACU):

1. an application;
2. copies of documents in accordance with which the infant nutrition products are produced (standards, technical conditions, regulations, technological instructions, specifications, recipes, composition specifications), certified in accordance with the legislation of the Party where state registration is conducted;
3. a manufacturer's declarations on the presence of genetically modified organisms, nanomaterials, hormones, pesticides;
4. a manufacturer's document on the use (operation) of the infant nutrition products, (instruction, manual, datasheet, recommendations) or its copy certified by the applicant (if any);
5. a written notification from the manufacturer that the infant nutrition products meet the requirements of the documents in accordance with which they are made;
6. a copy of the manufacturer's document certifying the safety and quality of the samples examined, certified in accordance with the legislation of the Party where state registration is conducted;
7. copies of labels (packaging) certified by the applicant;
8. a copy of the document from the authorized health authorities (other state authorized bodies) of the country of origin, confirming safety and allowing free circulation of the product in the territory of the state of the manufacturer, certified in accordance with the legislation of the Party where state registration is conducted, or the manufacturer's notification of no need for such a document;
9. testing reports (hygienic certificates), scientific reports, expert opinions;
10. copies of documents confirming the importation of samples of the infant nutrition products to the customs territory of the EACU, certified in accordance with the legislation of the Party where the state registration is conducted.

The manufacturer's documents shall be translated into foreign languages in accordance with the legislation of the Party where the state registration is conducted.

The applicant is responsible for the accuracy of the documents provided for issuing a document confirming the safety of products (goods).
