Terms of certification

The certification body of the personal protective equipment examines the application submitted by the applicant and a set of documents; the decision is made within a period not exceeding 5 working days from the date of receipt of the application.

The accredited testing laboratory (center) conducts testing and measuring samples of the personal protective equipment, draws up the testing and measurement reports and submits it to the certification body of the personal protective equipment.

The duration of the test depends on the type of the personal protective equipment and may take 1-2 months in the accredited laboratory.

The validity of the certificate issued under the 3C and 4C procedures is not more than 1 year; the validity of the certificate issued under the 5C and 6C procedures is 3 years; the validity of the certificate issued under the 1C procedure is 5 years.
